We do not in any way warrant, expressed, or implied, the contents or description, quality, productiveness, or any other matter of any seeds, bulbs, or plants sold by us and we will not in any way be responsible for the crop.

We guarantee, however, all stock sold by us to be true to name.

Peonies

We are fortunate in being able to offer our customers this season, an exceptionally fine assortment of Peonies, at prices which we believe are below the average. The quality of our stock is exceptionally fine. Stock is guaranteed to be true to name and if found not to be as stated, we will allow purchaser to keep the stock and make full reimbursement for the amount paid. The best Peonies are the cheapest in the end, and we want our customers to be certain that they get stock true to name. We have grown large quantities of Peonies and recently bought out a large Peony grower whose stock we know to be pure and whose assortment, together with our own, enables us to make a list which we believe cannot be surpassed. Good Peonies are scarce and no one will make a mistake to make an extensive planting of the better varieties. Peonies will give large returns on the initial investment, not only for the cut flowers, but the plants will increase in value from year to year. We ship strong two to five eye divisions and as it is important that Peonies should be planted early in the Fall, customers should not delay, but let us have their orders at once so that we can make prompt shipments as soon as possible.

Note: Leading varieties are marked *.
